

Materials Credits Documentation Sheet

LEED Green Building Rating System

This letter is to establish possible LEED credit qualifications for products manufactured by McElroy Metal.

Products: McElroy Metal Roofing and Siding Panel Systems

Material & Resources Credit 4: Recycled Content

Credit 4.1 (1 point) “Use materials with recycled content such that the sum of post-consumer recycled content plus one-half of the pre-consumer content constitutes at least 10% (based on cost) of the total value of the materials in the project.”

McElroy Metal roofing, metal siding and substructural members exceed the minimum post-consumer recycled content combined with one-half of the pre-consumer content. Industry averages are as follows: Post-consumer recycled content averages 24.3% and pre-consumer content averages 9.4%. Total recycled content averages 34.9%.

Credit 4.2 (1point) “Use materials with recycled content such that the sum of post-consumer recycled content plus one-half of the pre-consumer content constitutes at least 20% of the total value of the materials in the project.”

McElroy Metal roofing, metal siding, and substructural members exceed the minimum post-consumer recycled content combined with one-half of the pre-consumer content. Industry averages are as follows: Post-consumer recycled content averages 24.3% and pre-consumer content averages 9.4%. Total recycled content averages 34.9%.
