From: _____ To: _____

RESPONSIBILITIES OF MCELROY METAL

- Transport roll-forming equipment to and from jobsite.
- Provide technician to operate Quad Select equipment.

RESPONSIBILITIES OF THE CONTRACTOR

- Have coil and necessary accessories on jobsite.
- Loading 4,000 lbs. (max weight) coil on de-coiler.
- Provide equipment: off-loading material (time of delivery)
- Provide equipment: on-loading material (panels to roof), i.e., crane, spreader-bar, conveyor, etc.
- Provide asphalt road or gravel path to the job site.
- The process requires one man per every 10' of panel length.
- Some panels are directional: set-up from correct side of building.
- Provide labor to install panels and clips.

NOTES:

- McElroy's responsibility is limited to operating equipment.
- Oil canning (pan wave) is a natural occurrence in metal panels and is not cause for panel rejection.
- Material must be protected from the weather and kept free of debris.
- McElroy is not responsible for labor and/or other costs incurred in the event of equipment break-down.
- McElroy is not responsible for installation of panels.
