

Curved Roof Panels... hmmmm.
Imagine The Possibilities.

McElroy Metal

Maxima-ADV and Medallion I curved roof panels from McElroy Metal redefine your design potential. Design options extend even further with your choice of striated, ribbed, or flat pan profiles. Medallion I radii range upward from 3' and Maxima-ADV radii range upward from 20', utilizing panels from 12" to 18" widths. The panels are curved on-site* to achieve your desired architectural effect and a perfect fit.

Call **800-562-3576** to discuss your concept with a McElroy technical representative, and receive color chips and literature for your project. Or check it out yourself at www.mcelroymetal.com.

**Maxima-ADV panels curved on-site by a certified McElroy technician. Medallion I panels can be curved on-site by a McElroy technician, or by contractor personnel utilizing rented McElroy Curving Equipment.*
